

**Wharton Reg@Tech:  
Perspectives on Regulatory Approaches to  
Cryptocurrencies and Token Offerings  
September 7-9, 2018**

The Zicklin Center for Business Ethics Research at the Wharton School of the University of Pennsylvania will host an invitation-only meeting on the regulation, self-regulation, and co-regulation of cryptocurrency token offerings and related activities from a multi-jurisdictional perspective. This is the third event in the Wharton Reg@Tech series, which brings together an exclusive group of regulators, academics, attorneys, issuers, advisors, and investors.

The event will address the following types of questions:

- Comparison of national approaches.
- Economic realities of different types of tokens and issuance structures.
- Secondary market trading in cryptocurrency tokens.
- Evidence from the development of the market to date.
- Technical mechanisms to facilitate regulatory and legal compliance.
- Self-regulatory and co-regulatory approaches.

The workshop will be conducted under Chatham House Rules to encourage open conversation. We will encourage all attendees to actively contribute to interactive discussions. A more specific agenda will follow.

Organizers:

**William S. Laufer**

Professor of Legal Studies & Business Ethics, Sociology, and Criminology, University of Pennsylvania; Director, the Zicklin Center

**Kevin Werbach**

Associate Professor of Legal Studies and Business Ethics, Wharton School, Univ. of Pennsylvania

**Daniel Resas**
